

Identifying Even Numbers

IB PYP • Grade 1 • Mathematics

An even number can be made into complete pairs — no one is left over.

Name: _____

Date: _____

A. Make pairs. Then circle the even numbers.

4		8		9		12	
Odd / Even ☐	Odd ☐ Even ☐	Odd / Even ☐	Odd ☐ Even ☐	Odd / Even ☐	Odd ☐ Even ☐	Odd / Even ☐	Odd ☐ Even ☐

B. Circle all the even numbers.

1	4	6	7	10
13	16	17	18	20

Hint: Even numbers make pairs of 2 with nothing left over.

C. Complete the even-number pattern.

2, 4, __, 8, __

Count by 2s.

6, __, 10, __, 14

Count by 2s.

12, __, 16, __, 20

Count by 2s.

D. Think like a mathematician.

Is 18 even? Show how you know: _____

Write one more even number: _____ Write one even number between 1 and 10: _____
